NEW BOOKS

ADVANCES IN AGRONOMY, Edited by A. G. Norman. Vol. 3. Academic Press, 1951.

Contents.- The subsoil.- The management of alfalfa meadows.- The chemistry of soil potassium.- The changing pattern of agriculture in England and Wales.- The adaptability and breeding of suitable grasses for the southeastern states.- Chemical treatment of the soil for nematode control.- Problems and progress of soil conservation in the United States.- Irrigation, agriculture and soil research in the United States.

ARIZONA FLORA, By T. H. Kearney and R. H. Peebles. 1032 p. Univ. of Calif. Press, 1951. 455.81 K21

A new work based on Flowering Plants and Ferns of Arizona. Most of the longer keys have been rewritten, and there have been many additions and revisions.

A BIBLIOGRAPHY OF PUBLIC PERSONNEL ADMINISTRATION. U. S. Civil Service Commission Library. 6 parts. 1949. 165 B473

"This bibliography of Public Personnel Literature is the outgrowth of research work which the Library of the Civil Service Commission has performed over a number of years in the field of public personnel administration, including the evaluation and development of merit or civil service systems.

"It is arranged by subject and contains a listing of the books and periodical articles in the general and special fields of personnel work published through early 1949. The great volume of material that appeared in the emergency, war, and post-war period of the past 10 years is covered with particular thoroughness ...

"The increased volume of material on the subject of personnel administration has created a distinct need for some convenient means of locating published materials. Therefore, this compilation has its greatest use as a 'finding list' for research workers, educators, and administrators ...

"This bibliography is presented in 6 parts:

- I. Organization and Scope of the Personnel Program
- II. Position Classification and Pay Administration
- III. Selection, Appointment, and Placement
- IV. Employee Relations and Employee Services
- V. Service Rating, Training and Supervision
- VI. Separation and Retirement"

A BIBLIOGRAPHY OF PUBLIC PERSONNEL ADMINISTRATION. U. S. Civil Service Commission Library. Supplement No. 1, 1949-1950. 294 p. 165 B473 Suppl.

CHIPPED WOOD PRODUCTION AND USES. Northeastern Wood Utilization Council, Inc. B. 33, 135 p. 99.9 N819

The papers and discussion of a meeting held at Marlboro College, Marlboro, Vt. sponsored by the Council, the Soil Conservation Service, and the Pulp and Paper Research Institute of Canada.

Partial contents.- Wood chips and farming, by A. C. McIntyre.- Possibilities of wood chipping in forest management, by A. Koroleff.- Land clearing, by H. A. McKusick.- Mulch for berries, by V. G. Shutak and E. P. Christopher.- Decomposition of wood chips in soil, by M. Saloman.- Wood chips as a soil amendment, by H. A. Lunt.

FUNDAMENTALS OF SOIL SCIENCE, By C. E. Millar and L. M. Turk. 2d ed. 510 p. Wiley. 1951. 56 M613 Ed. 2

This thoroughly revamped second edition of a popular book, gives a complete, accurate, and up-to-date treatment of fundamental principles of soil science. Each chapter has been modernized to give it new life and usefulness. The authors combine the fundamentals with the new concepts in their attempt to solve the basic problem of soil science -- how to utilize the soil to best advantage. Approaching the subject universally -- information is regionally restricted only where necessary -- the authors supply excellent illustrations and tabular data to support their facts. There is a valuable Glossary of Soil Science for those who are not familiar with the terminology.

GEOLOGY AND GROUND-WATER RESOURCES OF SAN MIGUEL COUNTY, NEW MEXICO, By R. L. Griggs and G. E. Hendrickson. 1951. 121 p. (N. M. Bur. of Mines and Mineral Resources. Ground-water Rpt. 2) 406 N464

Describes the occurrence and availability of ground water, and the geology of San Miguel County.

GRASSES OF SOUTHEASTERN UNITED STATES, By F. W. Gould. 1951. 352 p. (Ariz. Univ. Biol. Sci. B. 7) 442.9 Ar4

This bulletin, although directly concerned with the grasses of Arizona, covers in its scope most of the grasses of the entire Southwest. In addition to the native species, there are included the numerous introduced grasses that have become established on rangelands, roadsides, and in waste places, as a result of accidental or intentional seeding.

HYDRAULIC RESEARCH IN THE UNITED STATES. Ed. by H. K. Middleton and S. W. Matchett. 1951. 190 p. (U. S. National Bur. of Standards Misc. Pub. 201) 157.88 M68

Reports research in progress at the various hydraulic and hydrologic laboratories in the United States and Canada.

NEW WAYS TO BETTER MEETINGS, By Bert and Frances Strauss. 177 p. Viking Press, 1951. 145 St82

This book offers practical help to people who lead and attend meetings. It is a useful reference for all USDA workers, as it is filled with many practical examples. In each chapter the authors describe some kind of a meeting, and offer practical suggestions for improving each. The book is easy to read and well illustrated.

PLANE TABLE MAPPING, By J. W. Low. 365 p. Harper, 1952. 325 L952

A book that tells all the things about plane table surveying that experienced engineers have learned by trial and error, by word of mouth, or by reading in many scattered sources.

It should be a boon to engineers or engineering aids required to produce topographic maps for irrigation or flood control reservoirs.

PRINCIPLES OF WEED CONTROL, By G. A. Ahlgren, G. C. Klingman and D. E. Wolf. 368 p. Wiley, 1951. 79 Ah4

A comprehensive coverage of this fast-growing science. This book contains all the facts and fundamentals associated with weeds, their life and habits, and most important of all, it provides scientific control techniques.

Beginning with a discussion of the fundamentals of control and eradication and the chemicals used in weed control, the authors go on to treat weed control in all types of crops (and in highway rights-of-way, irrigation ditches, lawns, etc.). Soil sterilants, special weed problems, and application equipment are discussed as well as the chemical and mechanical means of defoliation. Many of the new ideas and data on weed control given here are published for the first time.

RANGE MANAGEMENT: PRINCIPLES AND PRACTICES, By A. W. Sampson. 570 p. Wiley, 1952. 60.1 Sa4R

This book emphasizes the general principles of range management without minimizing practical applications. Divided into four convenient sections, the first gives a comprehensive picture of the subject, comparing it with related fields and evaluating the end products of the range. Part II describes, illustrates, and discusses native forage plants. Part III shows how to improve and manage range and stock, considering artificial and natural reseeding, water development, supplemental range feeding and sanitation, etc. Part IV offers methods of protecting land resources and range livestock, telling how to prevent livestock losses, how to control soil erosion, how to administer grazing on public lands, etc.

THE WATER SEEKERS, By R. A. Nadeau. 309 p. Doubleday, 1950. 292 N12

A direct, forceful account of the crucial search for water in the Southwest-- a problem which has become a crisis of nationwide importance. Water is no longer something to be taken for granted. Sources of supply are of vital importance, not only in the arid West with its growing populations, but in other sections of America as well. The author underscores the urgent need for corrective measures on a nationwide scale.

WILDLIFE MANAGEMENT, By I. N. Gabrielson. 274 p. Macmillan, 1951. 412.9 G11W1

"This book is an effort to appraise present wildlife management activities in terms of both weaknesses and strength. It emphasizes the necessity for a balanced program, and particularly the need for periodic checks on projects and practices to be certain that they are serving the needs of wildlife." Author's preface

NEW BULLETINS

AGRICULTURAL APPROPRIATIONS

DEPARTMENT OF AGRICULTURE APPROPRIATIONS FOR 1953. Hearings. Part 2. 1 Ag8Hes

Contains Hearings on the appropriations for Forest Service, Farmers Home Admin., Bur. of Entomology & Plant Quar., Bur. of Plant Industry, Soils and Agricultural Engineering, Production and Marketing Administration and other agencies.

AGRICULTURAL ECONOMICS

AGRICULTURAL FINANCE REVIEW - Farm Credit, Farm Insurance, Farm Taxation, Farm Construction. 1951. Vol. 14. (U. S. Bur. of Agr. Econ.) 1.9 Ec78Ap
